PFM 200N SERIES

AUTOMOTIVE POWER FAIL SIMULATOR FOR OEM LV 124 AND LV 148 AND OTHER MANUFACTURER STANDARDS

FOR TESTS ACCORDING TO ...

- LV 123
- OEM LV 124 (2013-02)
- LV 148
- OEM LV 148
- BMW GS 95024-2-1
- BMW GS 95026
- MBN LV 124-1
- VW 80000
- GMW 3172
- Chrysler CS-11979
- Cummins 14269 (982022-026)
- Fiat 9.90110
- Hyundai/Kia ES 95400-10, Rev. D
- Ivec 16-2103 Rev.15 (2010)
- Nissan 28401 NDS 02
- PSA B21 7110
- Renault 36.00.808/-L
- Toyota TSC7203G
- Volvo STD 515-0003
- many other automotive standards

PFM 200N SERIES - THE UNIQUE AUTOMOTIVE POWER FAIL SIMULATOR FOR LV 124 / LV 148 AND MICROINTERRUPTIONS AS PER MANUFACTURER STANDARDS

The PFM 200N100.1 and PFM 200N200 have been designed to fully meet the requirements for E10, E13 and E14 of the LV 124 and the E48-09 of the LV 148. It also allows to perform microinterruptions with fast rise/fall time of as low as 200ns as required by GMW 3172, sec. 9.2.18.

The PFM 200N series includes a switch for the power supply line from 100 mA to 200A and a separate switch in the ground return path. These switches can support very high inrush currents up to several hundreds of Ampères.

For signal- and data lines an additional 16 channel switch is included with current rating from 100 uA to 2 A per channel.

HIGHLIGHTS

- Switch for Power supply (100 A / 200 A) and signal/data lines (2 A)
- Pulses E10 and E13 of the LV 124/LV 148 standard
- Bidirectional current direction
- Separate switch in the ground line
- Rise/fall time less than 200ns

APPLICATION AREAS

AUTOMOTIVE

#### GENERAL SWITCH

- **Switch Impedance**
  - Power lines: < 50 mOhm
  - Data lines: < 500 mOhm
- **Internal switch**
  - Short circuit switch (DC+ to DC-), impedance <100 mOhm)
  - 100 mOhm, per LV 124
  - Low
  - High

#### TRIGGER

- **Trigger Out**
  - BNC Plug at the front panel,
  - Automatic release of the events
  - Trigger for oscilloscope,
  - negative slope 15 V
- **Trigger In**
  - BNC Plug at the front panel,
  - External release of a single event
  - Pull down

#### PROTECTION

- **DC Input protection**
  - Max. voltage ±100 V,
  - Clamped > 100 VDC
- **Data Input protection**
  - Max. voltage ±40 V,
  - Clamped > 40 VDC
- **Overtemperature**
  - NTC measurement on each mosfet switch
- **Overcurrent**
  - On each mosfet switch electronic protection
- **Current measurement**
  - Overload measured at output

#### INTERFACE

- **Frame bus**
  - Control cable to AutoWave
- **Monitor Output**
  - DUT out, differential,
  - BNC plug on front panel
  - Ratio 1:20

#### SUITABLE BUS SYSTEMS FOR DATALINE

- Low Speed Can 100 kbit
- High Speed Can 500 kbit
- LIN Bus 19200 Baud
- FlexRay 10 Mbit
- ...
