ESD NX30 - GENERATES ESD PULSES ACC. TO EN/IEC 61000-4-2 AND ISO 10605

Electrostatic discharges either from a human body to any other part or between two different objects can cause persistent disturbances or even destruction to sensitive electronics or controls.

esd NX30 is an ESD tester to simulate ESD pulses at higher voltages up to 30 kV in both air and contact discharge mode. It therefore satisfies requirements exceeding the EN/IEC 61000-4-2 test levels and complies to automotive test applications.

HIGHLIGHTS

› Test voltage up to 30 kV for air and contact discharge
› Color touch display
› Discharges up to 25 Hz
› 80 easy-to-change R/C-networks and tips
› Switchable Bleed-Off function
› Built-in activity log
› AC mains supply and DC supply
› Battery tested to 30,000 pulses @30 kV
